Panneaux de portes EkoLine

PVC | Alu

Design moderne, liberté dans le choix des fournitures et une large palette de couleurs offrent aux panneaux de porte EkoLine une carte de visite remarquable pour chaque entrée. Les matériaux de haute qualité garantissent sécurité et durabilité du produit.

Les clients peuvent choisir parmi les modèles proposés ou commander le sien, qui cependant doit tenir compte des exigences techniques.

La surface du panneau peut être décorée par des applications en acier inoxydable ou rainu-

rée en feuillure pour certains modèles.

Ce large choix fait que les panneaux de portes EkoLine se composent parfaitement dans des projets aussi bien modernes que classiques.

Nous proposons 2 sortes de remplissage; mousse de polyuréthane avec du contre plaqué ou juste du polystyrène extrudé XPS d'une épaisseur de 24, 36 ou 48 mm.

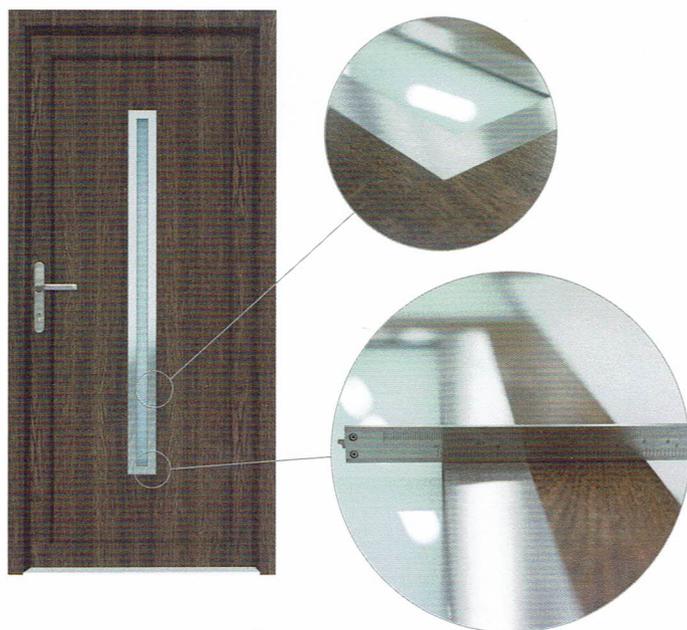

Selon besoin, les panneaux ont une finition en PVC stratifié haute pression HPL (plaxage) ou en ALU (poudrage RAL).

Les décors

Décors inox

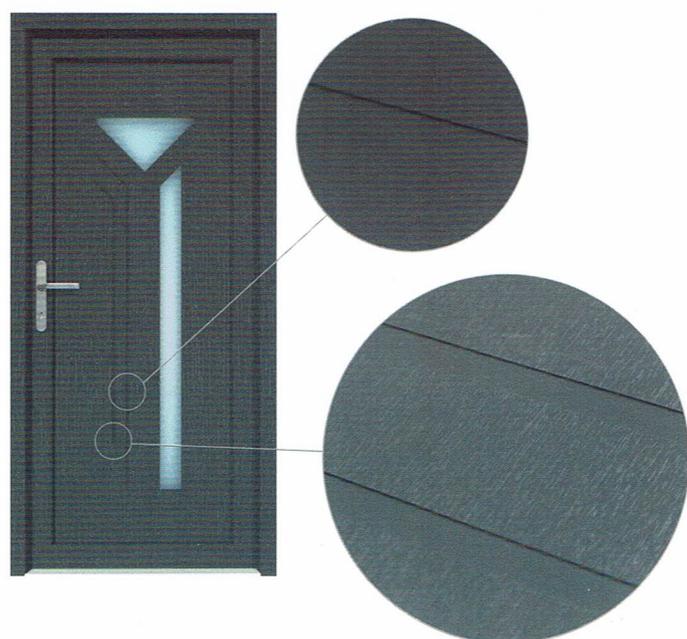

L'encadrement donne à la porte une allure imposante; les panneaux y ajoutent rythme et relief. Les plus recherchées sont les formes régulières et vitrées avec des applications décoratives en acier inoxydable.

Application en décor inox affleurant

Les décors en acier inoxydable affleurants à la surface du panneau non seulement apporte de l'élégance à la porte d'entrée mais aussi facilite son entretien.

EkoLine

Panneaux rainurés en feuillure

Pour ceux qui recherchent une décoration plus discrète nous proposons certains modèles avec rainures en feuillure.

Panneaux EkoLine

Les panneaux de portes EkoLine pour les plus exigeants de nos clients; personnalité, caractère et performances bousculent l'univers de la porte d'entrée.

Résistance

Contrôle à chaque étape de la production garantit une haute résistance contre l'endommagement mécanique et la déformation.

Design

Design unique et une finition parfaite pour les plus exigeants.

Qualité

Haute qualité de finition ne nécessitant aucun entretien.

Isolation

Le remplissage composite est résistant avec une bonne isolation thermique et phonique.

Spécifications techniques

Remplissage PLUS

HPL 2 mm

ALU 2 mm

contre-plaqué

mousse de polyuréthane

contre-plaqué

HPL 2 mm

ALU 2 mm

- épaisseur 24 mm (2/6/8/6/2)
- épaisseur 36 mm (2/6/20/6/2)
- épaisseur 48 mm (2/6/32/6/2)

Remplissage Classic

HPL 2 mm

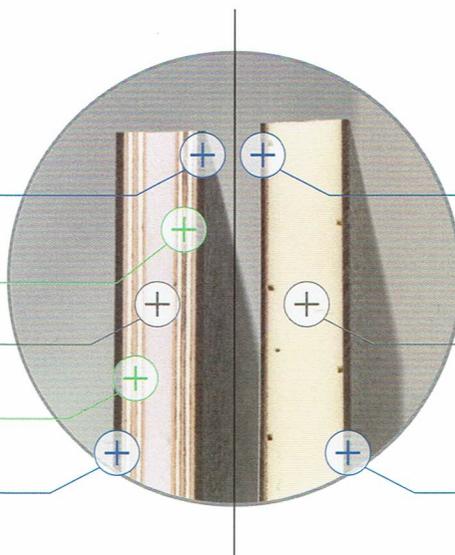

ALU 2 mm

polystyrène extrudé XPS

HPL 2 mm

ALU 2 mm

- épaisseur 24 mm (2/20/2)
- épaisseur 36 mm (2/32/2)
- épaisseur 48 mm (2/44/2)

Les panneaux EkoLine ALU sont recouverts de tôle ALU.

Les panneaux ALU ne sont pas en imitation bois mais uniquement en poudrage RAL.

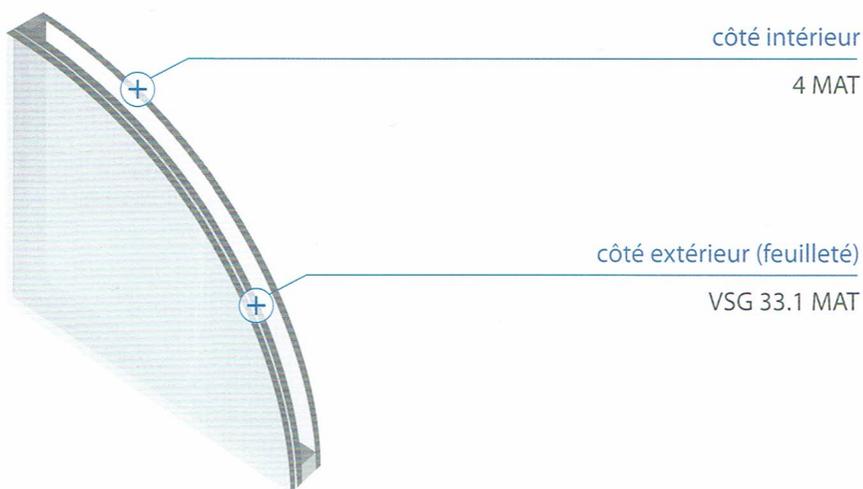

Une large gamme de vitrages possibles

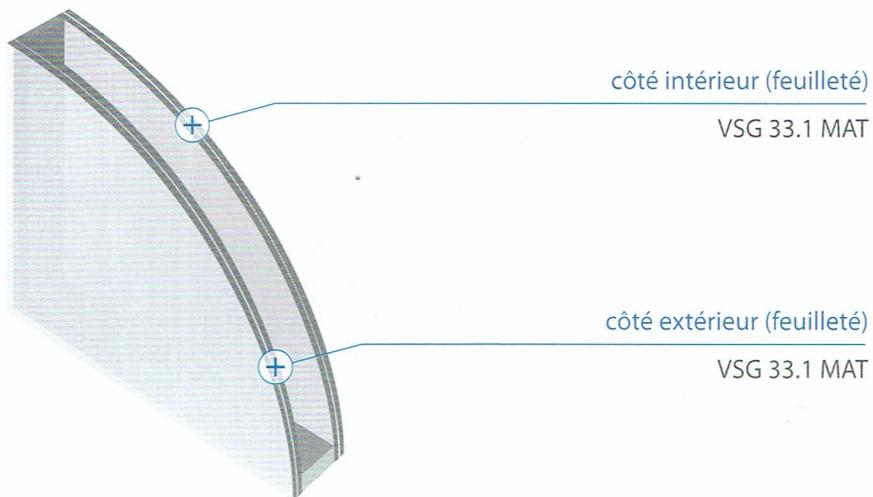

Le vitrage en standard 24 mm est sablé et feuilleté;
pour les panneaux plus épais il devient doublement feuilleté.

Vitrage standard
